MAJOR G. MATT ADAMS has in charge of the Pension agency at Louisville.

At Memphis last Wednesday an N. N. & M. box-car was smashed to pieces in a collision. It contained 30,000 pounds of stick dynamite. It seems a miracle that no explosion occurred and no one was hurt.

The effervescent, ubiquitous and ever-boiling up Thos. S. Pettit has refused the nomination tendered him by populists of the Second Congressional District. He got up right in the Convention at Henderson Saturday and "spoke out in meetin'" and told them he couldn't. Did you ever?

It will be remembered that two years ago Rev. George W. Dennis was run over by a train of cars in Louisville and both legs and one arm cut off. He sued the railroad company for damages and last week was awarded \$5,000. He is not satisfied with the verdict and is asking a new trial. He used for \$25,000.

ONE C. C. Moore, of Lexington, has by recent blasphemous utterances in his infidel newspaper succeeded in stirring up the people against him that he has been indicted by the grand jury. He has employed Bob Ingelby to defend him and will stand here on Kentucky a stock of infidelity and heretical opinions, spouting from the New Yorker. Poor old Kentucky! Her shame accumulates.

The few Republicans of Davies county got themselves together Saturday and named the following ticket: S. W. Bennett for County Judge, C. W. Kimbley for Clerk, J. E. Karr for Compt. Auditor, Almon Thompson, Sheriff, H. H. Hamblin for Assessor, T. Allen for Jailer. This is our Charles Kimbley, but he would better be keeping in fun and funds by spinning around on a "flying dutchman" than wasting his time and his substance chasing rainbows. The Democrats will always fill the offices in Davies.

HAMPTON county has done the wise thing by appropriating \$100,000 surplus money now in her treasury for the building of good roads in the county. The state makes the fiscal conditions in threatening that the roads should be turnpikes. There is small gain in turning loose a wad of public or have shamed in such revealing details. The complaint was for breach of promise of marriage, under which promise the plaintiff claimed to have been seduced by Col. Breckinridge. The story of his wrong was one of the most affecting ever told. She told how for nine years she had sustained improper relations with the Congressman, and how he had promised to resign if she would marry him. After marrying her, he married another woman and Mrs. Pollard had him for \$50,000. Her verdict will be worth nothing to her in a financial way, as Mr. Breckinridge is wholly insolvent. It will—or it ought to—ruin the life of the man who by his own confession that he never had, at any moment, brought the fear of death into his relations with Mrs. Pollard.

Having found a verdict for the plaintiff, the Pollard-Breckinridge jury gave an expusion to public sentiment. It is the everlasting credit of this body to have made no compromise with either party. The court stuck to the black principle of manliness in coupling the Kentuckian's course.

(Louisville Journal.)

The defendant is to be held for a pendency to decide in what season when he had the most universal sympathy that ever descended the popular scale to have a hearing.

Breckinridge says he is still a candidate for Congress from his district, but it is hardly possible that any respectable number of men could be found in Kentucky to vote for him who had morally as well as physically betrayed the people. Indeed, Massachusetts was the only one of the original thirteen States which in the first instance retained its Constitution to the popular advantage. Such reference to the people is the great wear of his course.

The jury and the country repudiate the plies of Butterworth and Thompson, "Speak for yourselves, gentlemen!" the country thundered in their ears. "Do not let us hear any more of your lies and hypocrites are factors of the daily life of a majority of American men. Begone, awfully, ye scoundrels of humanity!" The verdict is in accordance with that rendered weeks ago by the people.

**OURL JAIL.**

It is not strange that prisoners should be taken from the present jail to the new one. In fact, it is not strange that the new one should not leave the place some night in a body. There is one and only one way to be sure this will not happen. That is for the Jailer to stand guard all day and all night near the cells of the prisoners.

The building is little more secure than a chicken-coop, and it is only a question of time when either a

part at rest any lingering hope any jail must be built or justice must come to be only a name here. A light steel bar 1 inch thick and 12 inches wide is the only thing between the prisoners in jail and their liberty. With the present number in the cells it is impossible to prevent plans for escape being constantly formed. These are not room to separate the prisoners, so that with or eight men confined in a cell about seven feet square, on whom they are constantly planning to escape.

The building is too small to accommodate any good number of prisoners as it is but a shell, offering almost no resistance to persons desiring to escape. Those who think this and who are interested in seeing justice properly administered here, are invited to call and see the place where our criminals are confined.

One of two things must happen—we must have a new jail or judges in this county will be totally disarmed.

**WHAT THE PARTY HAS DONE.**

The Democratic party has repealed the Harrison election law.

The Democratic party has repealed the Sherman act.

The Democratic party is cutting down appropriations and is practicing parsimony.

The Democratic party of the House sent to the Senate a bill reducing taxes on imports by \$100,000,000 and relieveing the shomoy in doing so.

In 1899 the Republicans passed the Sherman act and the McKinley bill.

The party was warned of the effect of these measures on currency and on prices.

Democrats in declared that consequences were inevitable; that confidence would be shocked; that trade would be interrupted; and that we were too drunk to measure its effects.

These predictions have been fulfilled. Last year, before Congress met, the state broke on the country. Banks failed; cities closed, mercantile went out of blast and distress everywhere prevails.

The task before the Democrats was a difficult one of reorganization and have been successful, but unfortunately, legislative bodies are slow and uncertain. The people await the action of the Sherman. The Sherman act has been deprived of its worth by the fact that it is not a national bill, but a sectional one.

The date of adjournment is to the industries of the nation—and to the Democratic party.

The Democratic party is not responsible for this delay; it is not a national bill, but a sectional one.

In the Senate the possible result of the delay is to injure the industries of the nation—and to the Democratic party.

WEDNESDAY, APRIL 18.

## MONTHLY CROP REPORT.

The reports from the correspondents for the month of March are very large, and differ very much. All that were written before the freeze were favorable, and agricultural interests of the country is a very flourishing condition; all farm work well advanced; farmers ready to plant corn, wheat, rye, oats and barley; all kinds of grain were sown, one recollects to have seen three or four of all kinds were for advanced; clover almost ready for grazing; gardens everywhere being plowed; in many cases, the vegetables were sown, that winter was over. Those that were written after the freeze are very different: The condition of the wheat crop is somewhat uncertain; in some cases, wheat was sown well, in others, wheat, that which was sowing, has been killed, but that it will stand up and make some wheat, and the late sown wheat is considered damaged, and looks like it will not stand up—this is a case where I will not undertake to make a per cent of its present condition of the crop, for to add up all the reports, "there would be no wheat left in the country if we were not," would not give a correct statement. I will, therefore, wait another month, as there are a number of good farms who say that they can get out of the damage, and after the rains come.

The condition of the rye and barley crop is very similar to that of wheat, being a main harder crop, is not damaged much; but as the rye and barley are so early to fall, of course, the frost coming suddenly, some think that they have all suffered alike.

**CLOVER.**—Nearly all the correspondents report a crop, older than last year, will be very heavy, but the farmers, as the seed was very high. A correspondent from Clark county writes: "Young clover all killed, and old clover fields that were up are laid low, and small clover hay is spilling in summer."

**OATS.**—A correspondent from Stamford, Lincoln county, says: "The crop seems to be killed, but the field may be recovering." This is the report of nearly all of the correspondents in regard to the oat crop. It would be wise to be too great a hurry to sow where the oats did not stand up, as the ground is still frozen, but to wait for warm sunshine. I have examined, some that were well covered, where they were laid low, and they will likely stand this freeze better. There was over a week's delay.

**PEAS.**—A correspondent writes: "Fruit of all kinds killed; but I think the grapes are not all killed, nor all the strawberries, as the frost did not last long enough to prevent them from ripening. Some fruit trees are killed; some think that all the peach trees are killed; some think that all the apple and two-year-old trees."

**ONIONS.**—So many thought that winter was over, and planted a number of vegetables, such as peas, onions, beans, early corn, all of which they have lost, and will be compelled to plant again. The same is true of carrots, and other root vegetables.

**TOMATOES.**—A correspondent from Mariontown, Indiana, writes: "I have sown my tomatoes, re-sown my tobacco beds, re-sown my tobacco beds." The reports vary as to tobacco beds, although there are a great many similar to the one above. Where the beds were unprotected, there were great losses.

**CARROTS.**—The number of two-year-old carrots that have been carried over and will be put to grazing the coming season, is likely to fit, if not above, an average for former seasons.

**LEAVES.**—The number of eaves are reported to be small, but an increase of leaves on account of the very mild winter, per cent., 90.

**HOPS.**—Hop chokers have been prevailing in some counties. Many have had a great loss. What is the cause of this? I could mention.

**STOCK.**—The number of stock has increased, but a number of the reports are to the contrary. The increase in per cent. over last year, per cent., 98.

**LAMBS.**—The number of ewes are reported to be small, but an increase of lambs on account of the very mild winter, per cent., 98.

**HORSES.**—Hog cholera has been prevailing in some counties. Many have had a great loss. What is the cause of this? I could mention.

**YOUNG HORSES.**—The number of two-year-old colts that have been carried over and will be put to grazing the coming season, is likely to fit, if not above, an average for former seasons.

**NEWBORN HORSES.**—The number of newborn horses is reported to be small, but an increase of newborn horses on account of the very mild winter, per cent., 90.

**A HARTFORD COUNTRY TEST.**—For a quarter of a century Dr. King's New Discovery has been tested, and has been found to be a safe remedy from its use to testify to its wonderful curative powers in all diseases of the human body. It is a safe remedy that has stood the test so long and that has given so much hope to the world that it should be given to all to relieve suffering, to give relief, or the money will be returned. **Growing Tobacco.**—*Editorial.*—The value of a good tobacco soil in human. Human decayed vegetation, coarse stable manure, decayed leaves, or anything in the nature of decayed vegetation makes a good fertilizer for that is to be planted tobacco. We should not let the soil be too dry, and it will pay to apply all that can be had. Sheep manure is also considered good for tobacco.

**AN ANIMAL FERTILIZER.**—A muriate of potash, muriate of ammonia, and phosphoric acid are valuable, and in purchasing commercial fertilizers, the proportion of these is important. When tobacco is made a crop on the farm it is an item to be very careful about, as it is a heavy feeder, and it will take all that can be had. Sheep manure is also considered good for tobacco.

**THE PLANTS SHOULD BE GROWN IN A**

seed bed, the place selected being a loose, loamy soil, made reasonably rich and clear of weeds or roots. One advantage of which is that a top dressing is not required, as it helps to draw the weeds. For this reason many have a brush pile as a preliminary to making a tobacco plant bed.

Humanity is now so bad, we

are never in seeing not to get them thick.

If too thick in the seed bed, the plants will grow tall and spindly, while woody plants are more hardy.

Therefore do let us be kind;

let us govern our tongues, if not our thoughts, and in this way save a world of trouble, woes and twinges of conscience for ourselves.

**BIG AND LITTLE AGE.**

The town of Wentville, Mo., has a curiosity in the shape of a boy 12 years old who is five feet, seven inches in height, and weighs 220 pounds.

He is the son of Mr. and Mrs. N. S. Wade, and he is the eldest son of that place.

Mr. and Mrs. Wade have been married 20 years, and have ten children.

All the boys are over six inches high, they are larger enough to transplant where they are to grow. If to be

cultivated both ways, mark out the rows three feet apart each way. It is to be noted that the plants are to be set out in the soil as they are, and also to see that the soil comes in close contact with them. The manner the more carefully the plants are packed about the roots the less loss in transplanting and the better the start to grow.

A peculiar theory is advanced by a recent report of W. H. Moore's experiments, that says that the time he

was able to walk has been his habit to follow his father, who is a butcher, to the slaughter pen and there to drink quantities of the blood of beves just slaughtered. It is believed that this practice is what gave him his phenomenal growth.

The boy is the pet and curiosity of the whole community, and about 200 people follow him to see him grow.

His relatives on both sides are small people, or below the average in size or weight.

**QUEER CAUSES OF DIVORCE.**—*Encyclopedia.*

A woman who has a son, a daughter, and a son-in-law, has secured a divorce from her husband because she has the right to the inheritance, which she has set forth in her petition, "that defendant pinched the nose of the plaintiff, causing it to become red, swollen and painful; defendant great pain and anguish of mind."

An Ohio man has secured a divorce because, as he declared under oath, "the defendant pulled the plaintiff's hair."

The Weekly Courier-Journal has struck a popular note in its weather guessing contests.

A henpecked husband secured a divorce in a Pennsylvania court because the language of his affidavit, "the defendant struck the plaintiff a violent blow with his fist."

A Missouri divorce was lately granted because "the defendant goes gallivanting about, leaving the plaintiff surprised and, if necessary, he gets to him."
